

License [IQ] for Oracle

Automated licence optimization for 30% savings

Introducing License[IQ]: Automated Oracle license compliance governance and optimization

[Get Started Here](#)

No License Optimisation

Automated licence optimization for 30% savings

- **Limited usage tracking:** Limited license usage tracking which is slow complex and prone to errors
- **Compliance issues:** Compliance issues resulting from deployments, accidental usage or cloud migrations
- **Oracle audits:** Surprise Oracle Audits with no control or leverage over audit process or results
- **Unplanned Purchases:** Unplanned purchases do not typically put the customer in a strong position for purchases
- **High support costs:** High Support Costs
- **No License Optimization:** No ongoing optimization for reduction in license costs or termination of unused licenses

Smarter Financial Planning

How License[IQ] Puts You in Control

- **Optimize Licensing Costs:** Quickly pinpoint and eliminate unnecessary Oracle licenses.
- **Negotiate from Strength:** Gain real-time insights to secure better pricing & contract terms.
- **Audit Defense Built In:** Continuous compliance tracking minimizes risk and avoids penalties.
- **Smarter Financial Planning:** Map real usage to cost centers for tighter control and accountability.
- **Full License Visibility:** Consolidated license insights eliminate shadow IT and ensure complete control.

Cut Oracle Licensing Costs By **Up To 30%**

Business Wins with License[IQ]

- Cut Oracle license costs by up to 30% by rightsizing and retiring unused assets.
