

Cut Oracle Exadata Cloud Costs by up to 65% Automatically

Introducing **Exadata AutoScale.IQ**: Real-Time OCPU Optimization Without Performance Trade-offs

Running Oracle Exadata on OCI delivers high performance but comes with high cost when resources are overallocated. Exadata AutoScale.IQ from Cintra solves this challenge with intelligent automation that dynamically adjusts OCPU resources in real-time — so you only pay for what you use.

In a recent implementation with a global brand, our solution is projected to save over €1M annually — a 65% reduction in OCI spend. All with zero impact on system performance.

What are the key features of AutoScale.IQ?

- Real-time scaling of OCPUs across Exadata Cloud Service (ExaCS), Exadata Cloud@Customer (ExaCC), and Exascale
- Driven by observed CPU and cluster load patterns
- Operates within defined minimum and maximum thresholds for full control
- Utilizes OCI-native API commands for seamless enablement and billing alignment
- Notifications via email or OCI channels for complete visibility

Why Enterprises Choose AutoScale.IQ

- Significant cost savings: Cut OCI costs by up to 65%, with even greater impact when using PaaS licensing
- Pay only for what you need: Scale resources up or down instantly based on real-time workload demand
- Enhanced performance: Eliminate manual CPU adjustments and avoid resource bottlenecks
- Automation-first: Reduces the need for manual intervention, performance tuning, and incident tickets
- Accelerated operations: Improve user experience while adopting cloud cost optimization best practices

Flexible, Low-Risk Commercial Model

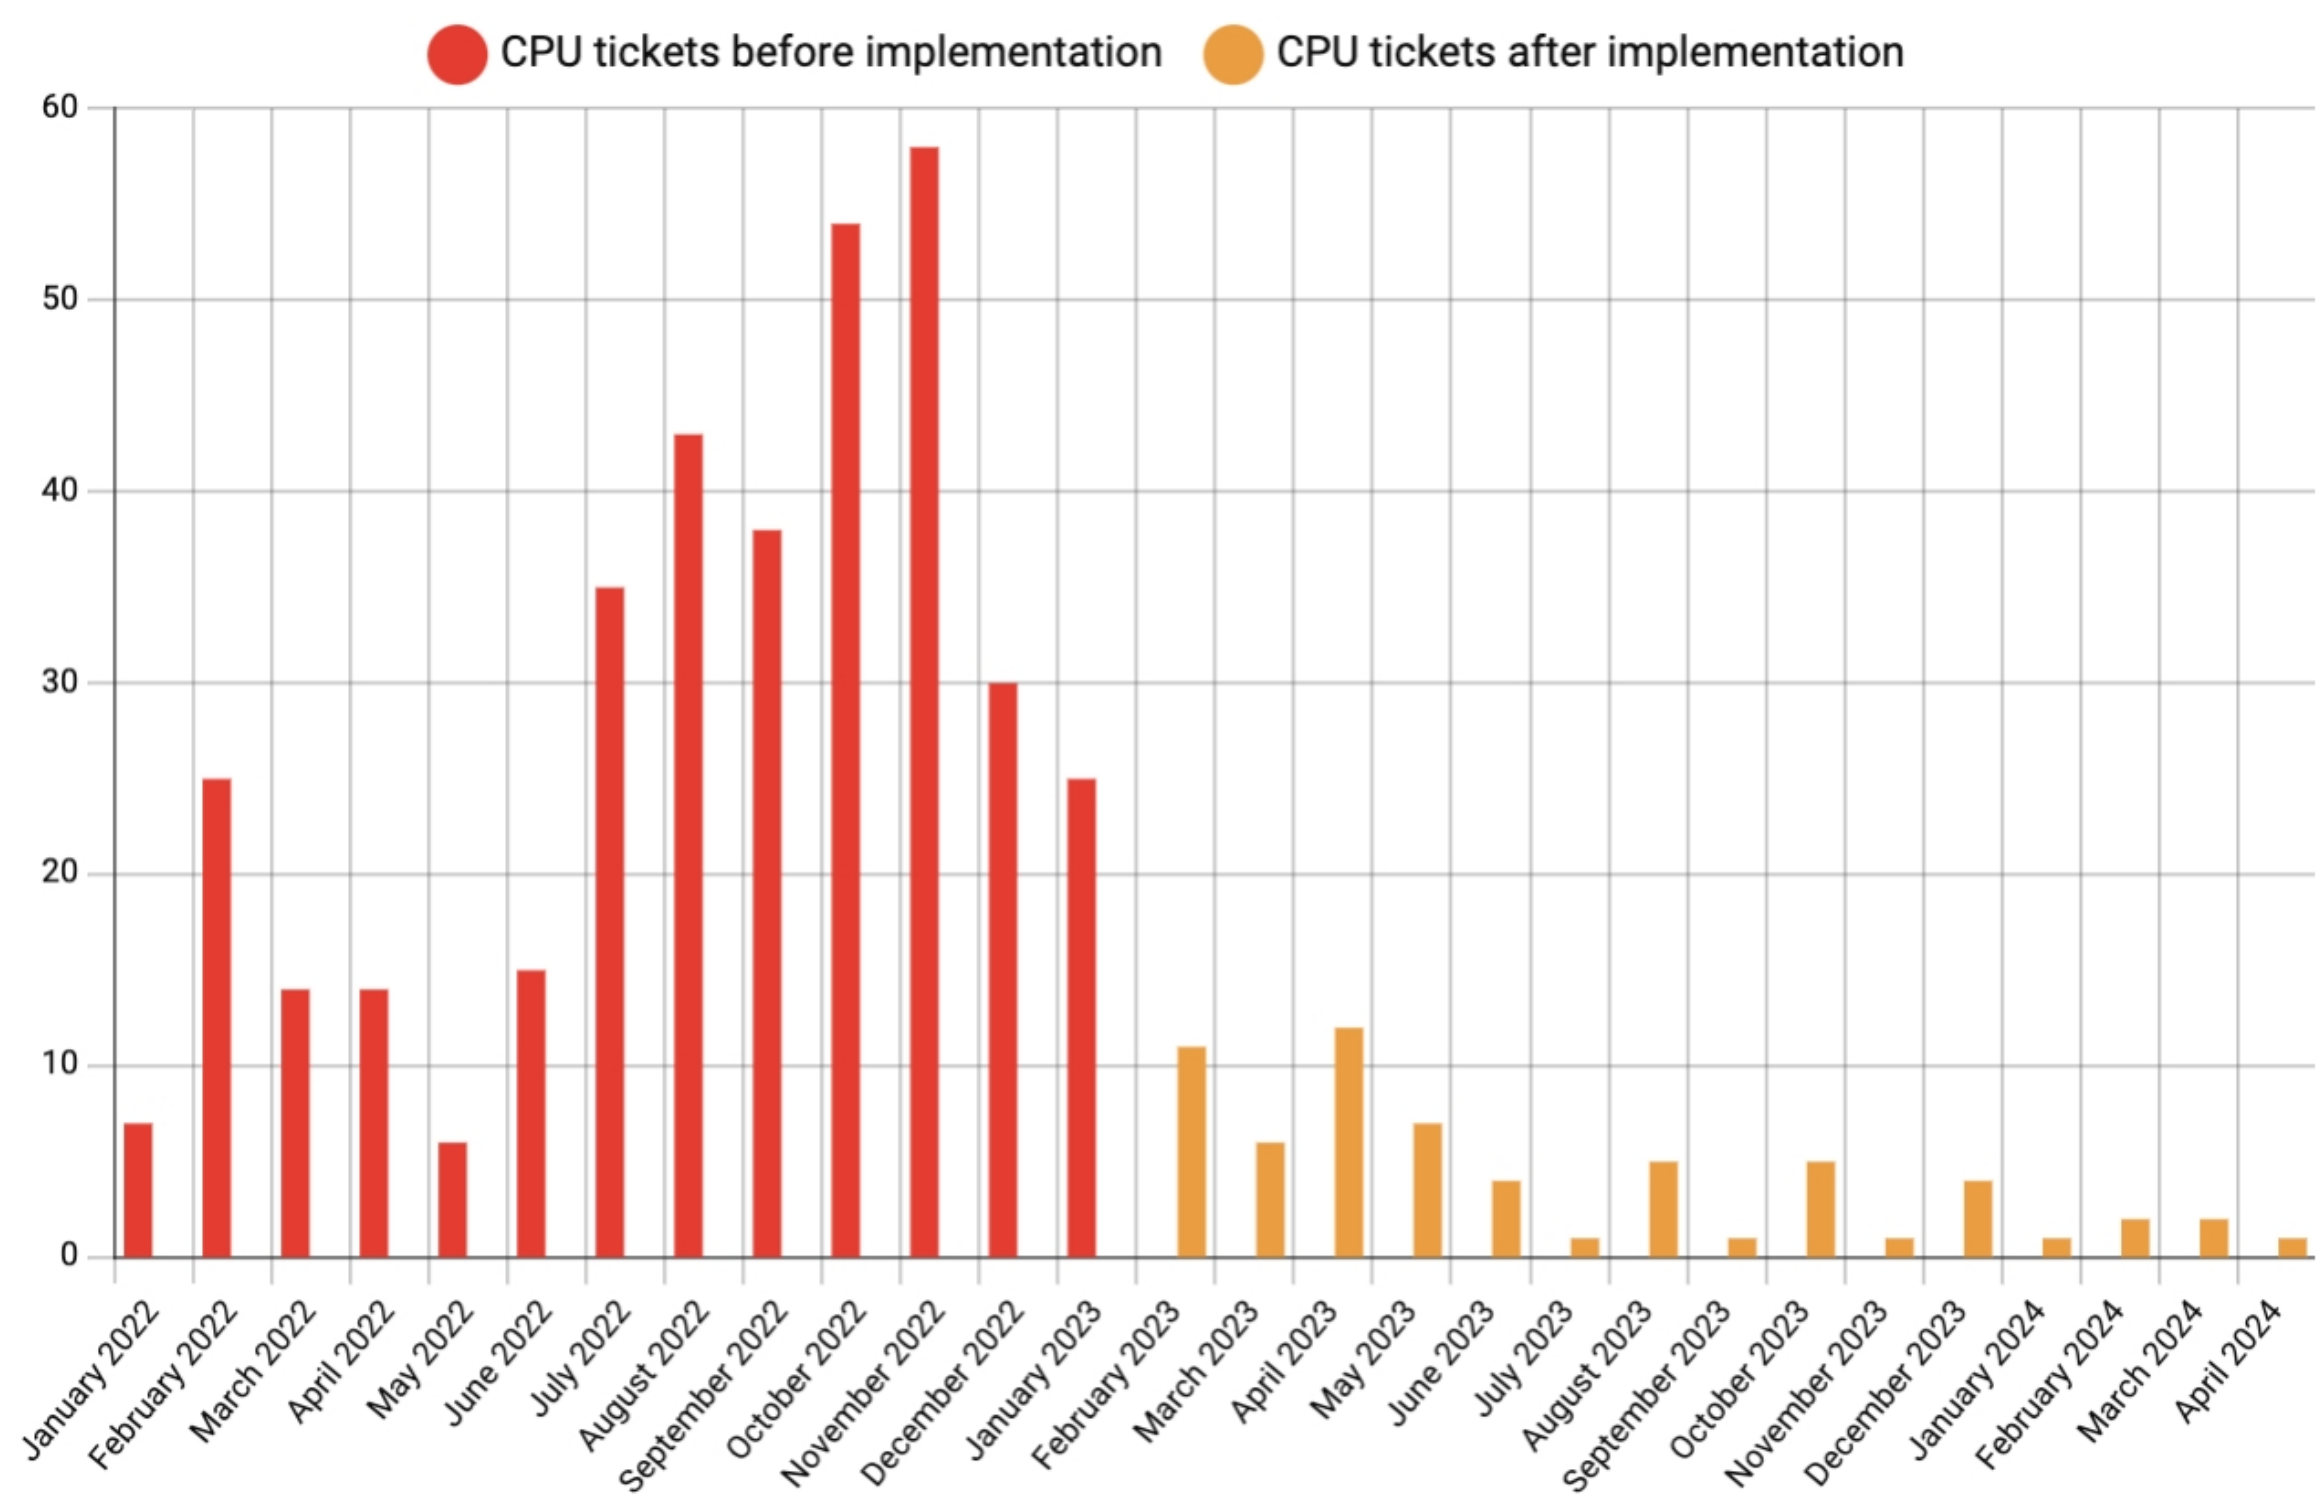

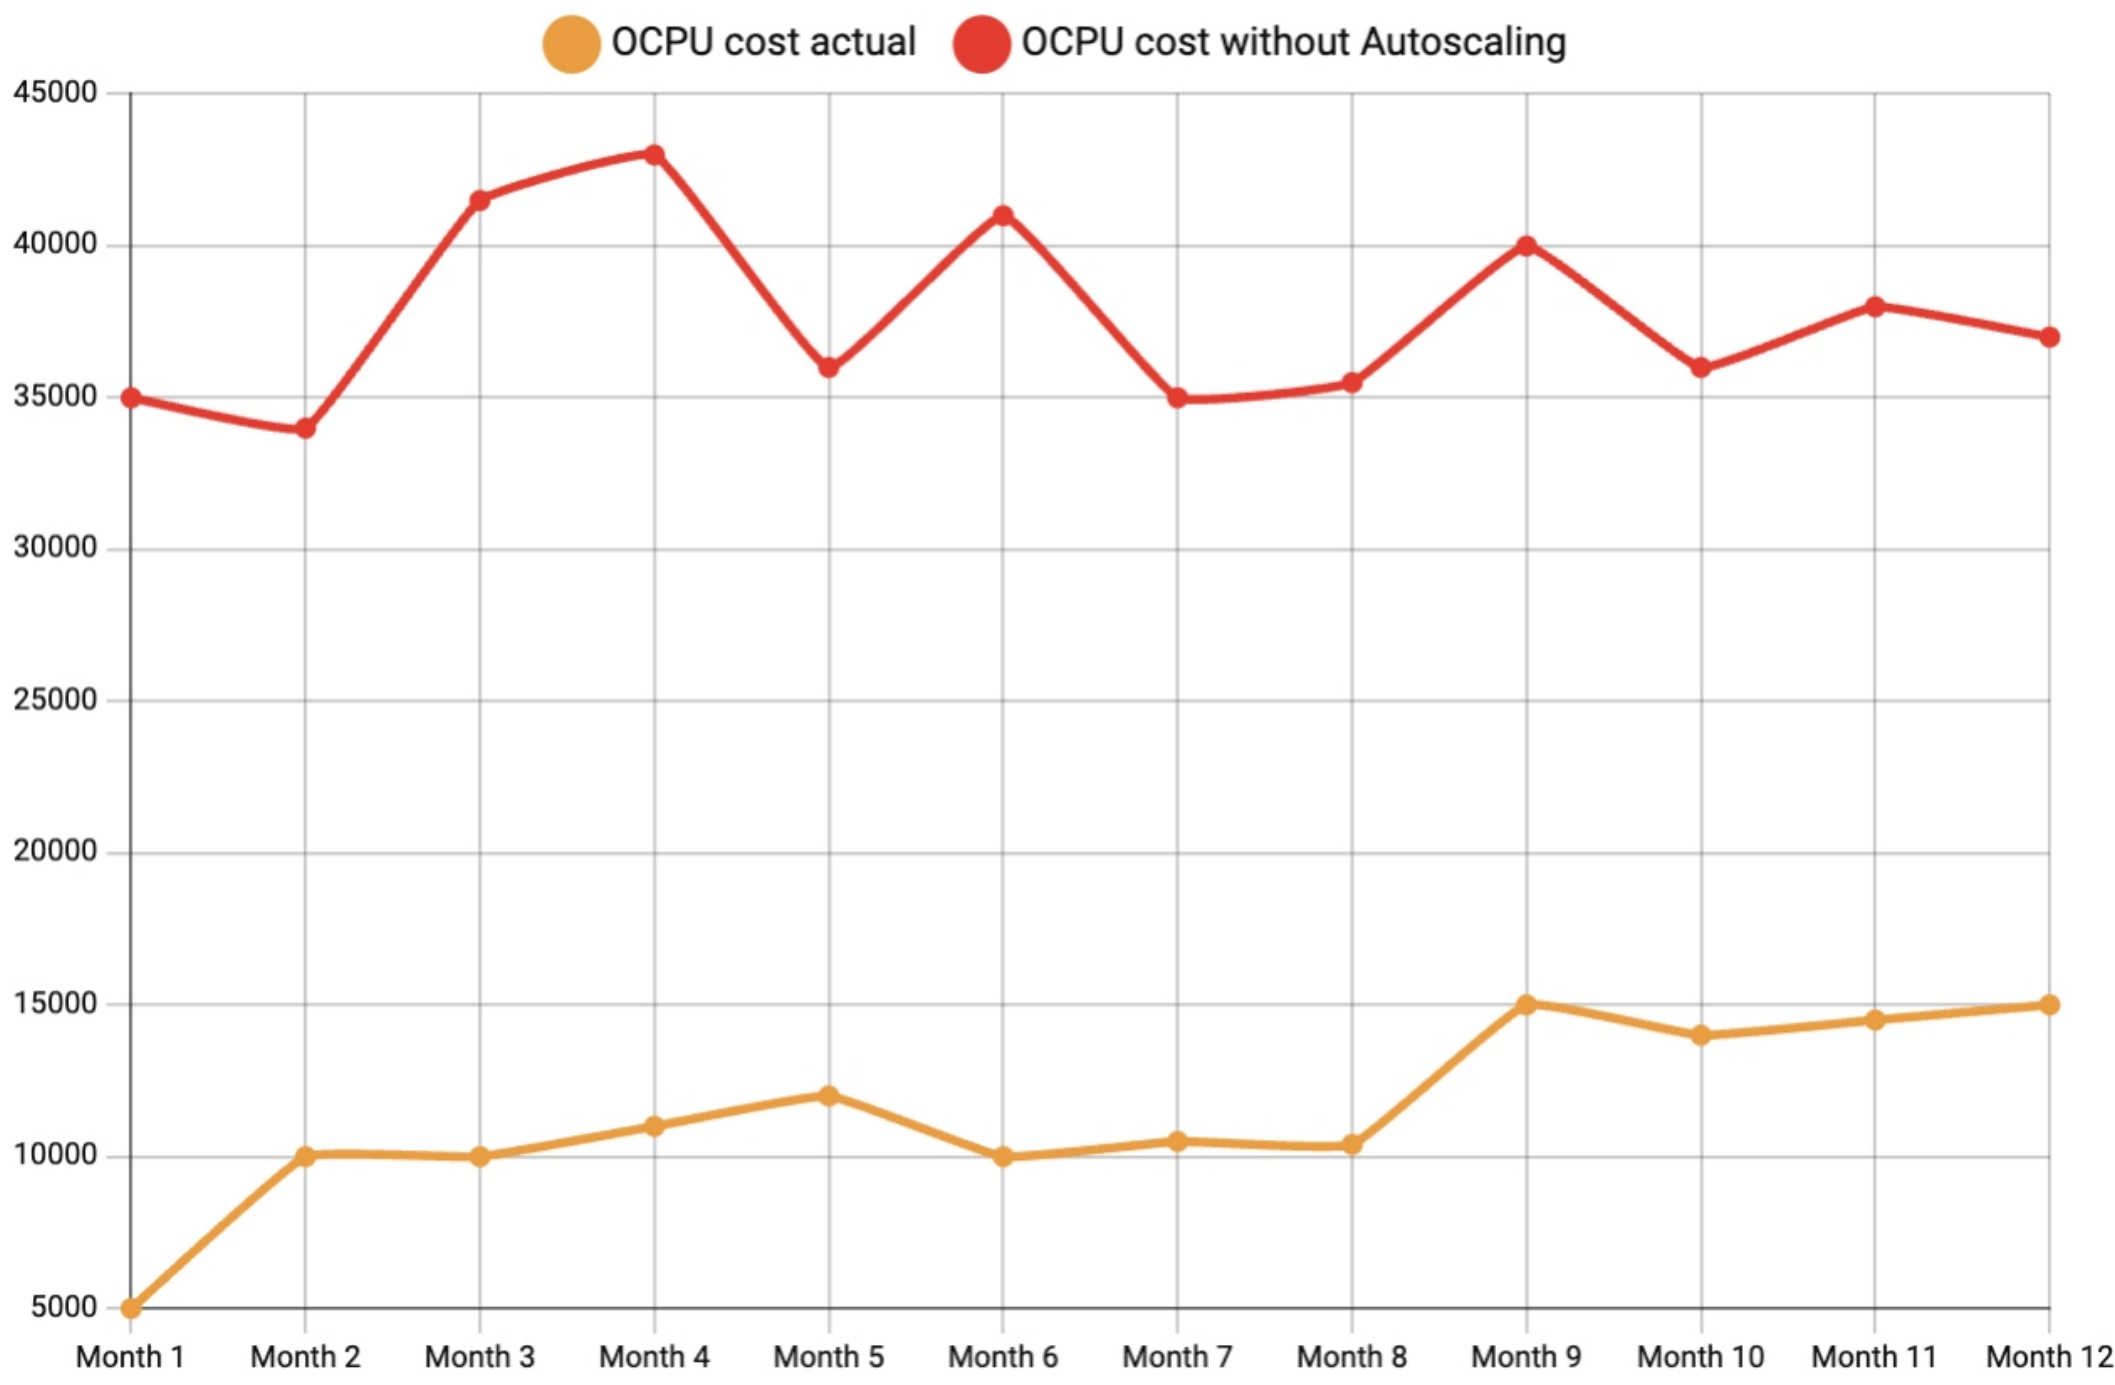

- No downtime or disruption to implement
- Subscription-based pricing based on realised/measured savings
- Cancel anytime if savings are not material
- Available standalone or packaged with Cintra's OCI optimization services

Why Cintra

With over 28 years of Oracle expertise, Cintra is a certified Oracle Managed Services Provider specializing in Oracle Database, Middleware, Applications, Engineered Systems, and OCI Cloud. We deliver proven, data-driven solutions that help global enterprises modernize and optimize their Oracle environments — at scale and with confidence.

With Cintra's AutoScale.IQ for Exadata, you can automatically scale up and down OCPU allocations in Exadata Cloud Service (ExaCS), Exadata Cloud@Customer (ExaCC) and Exascale
