

# VMware Exit Assessment

## Facing unprecedented challenges with VMware?

Your VMware costs are about to soar by 3-5x, with some customers facing up to 1200% increases - significantly straining your IT budget. Service quality is expected to degrade, leading to more disruptions and inefficiencies. Security risks are increasing, exposing your data to potential breaches and compliance issues. With renewal deadlines looming, the pressure to act is mounting. For these reasons many users are looking to migrate off VMware.

### Mitigate your risks

Ignoring these changes could have severe consequences for your organization, here's what's at risk:

## Take charge with our VMware Exit Assessment

### ✓ Evaluate Your Current Environment

Using our rapid discovery tool we can quickly evaluate your VMware deployment and license requirements

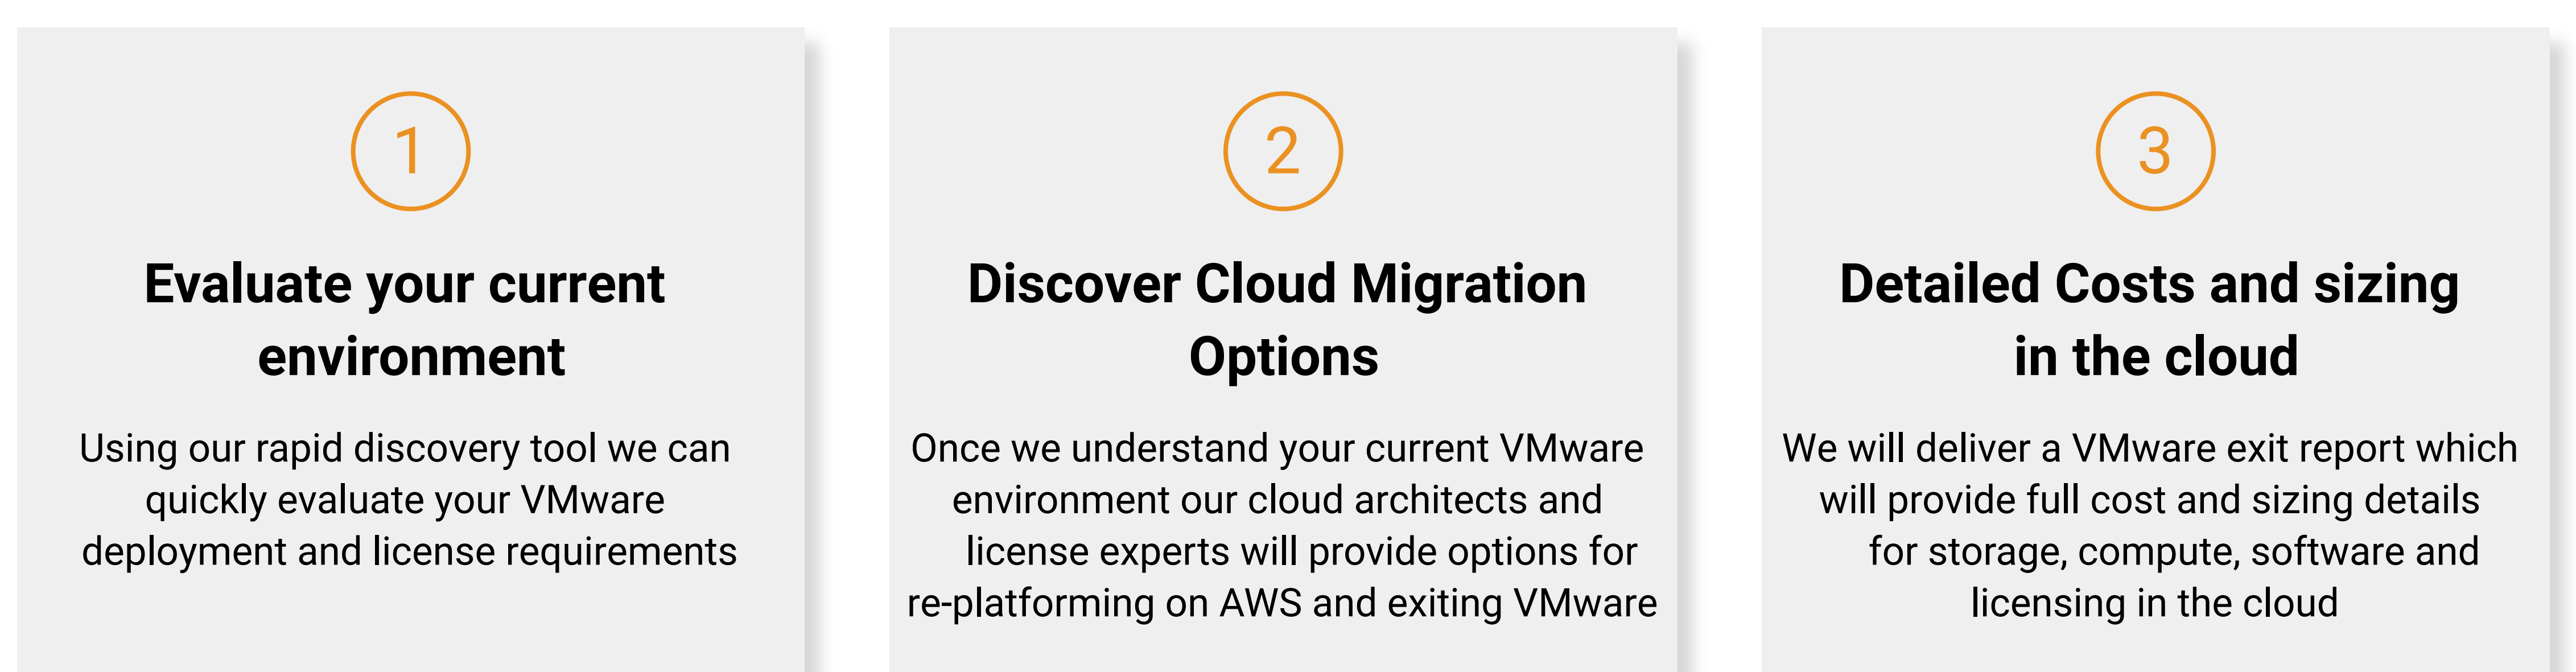

### ✓ Discover Cloud Migration Options

Once we understand your current VMware environment our cloud architects and license experts will provide options for re-platforming on AWS and exiting VMware

### ✓ Detailed Costs and Sizing in the Cloud

We will deliver a VMware exit report which will provide full cost and sizing details for storage, compute, software and licensing in the cloud

## Take charge with our VMware Exit Assessment

## Instant gains from VMware Exit Assessment

Avoid massive cost increases, maintain service quality, and enhance security by fortifying your data protection and compliance measures.

Don't wait for your VMware renewal to catch you off guard. Our VMware Exit Assessment offers you a way out before it's too late. Take charge and save your company from financial strain, operational disruptions, and security threats.

The assessment is fully funded so there is no cost to the end customer

The assessment will be completed in just 3-4 weeks
